DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 21, 2006 has been entered.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Election/Restrictions

3. Claims 1-22 and 29-31 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on May 31, 2005.

Drawings

4. Figures 4-6 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the

Art Unit: 3752

applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The "Brief Description of the Drawings" indicates that figures 4-6 show a "conventional sprinkler nozzle."

Claim Rejections - 35 USC § 102

5. Claims 23-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Pougnet (1,102,354).

Pougnet discloses a nozzle comprising: a wall **b** defining a water channel; a water deflector **a**; a further deflector (vanes of pipe **b**) associated with the middle aperture and a deflector (vanes of pipe **b**) associated with the lower aperture. See figure below.

Response to Arguments

6. Applicant's arguments filed April 21, 2006 have been fully considered but they are not persuasive.

Applicant argues that Pougnet does not discharge water from the apertures in the wall but rather from nozzles in the form of extension pipes projecting outwardly from the all of the vertical pipe b. Applicant's argument is not commensurate in scope with the claimed invention. Claim 23 does not preclude the nozzles a of Pougnet.
